MeaWallet™

Mea Token Control

Mea Token Control is a central hub that puts consumers in charge of their tokenized cards. Enhance the user experience of your offering, drive engagement, and reduce the strain on your help desk.

Key Benefits

| Enhanced UX | Increased engagement | Higher help desk capacity |

Key Features

| Ready-to-implement SDK and APIs | Multi-scheme support through one integration | Suspend, resume, and delete tokens | Available on Android and iOS |

Why Mea Token Control?

A central token control hub where customers can easily track and manage their tokenized cards across different wallets and payment schemes.

Easy implementation and fast time-to-market.

A self-service solution that increases the use of the Issuer app and reduces requests to customer services

Supported Schemes
