Mea Token Platform - enabling mobile payments and SRC

The introduction of EMV tokenization has led to significant growth of various OEM Pays and HCE payments. This has made issuers eager to tokenize their own cards and enable them for mobile contactless payments, as well as tokenized eCommerce - using Secure Remote Commerce (SRC).

By using the Mea Token Platform, issuers can easily enable their own Issuer Pay, issue cards to OEM Pays and support tokenized eCommerce - with one single connection. This lets the consumers perform secure payments in any channels, whether it is online, in-app or "tap & pay" at one of the millions of contactless payment terminals deployed worldwide.

The Offer

The Mea Token Platform provides a common interface to multiple Token Service Providers (TSPs) through one single integration. Enable OEM Pays and SRC through the product's Issuer-to-TSP connection, or have your own 'Issuer Pay' by using the Wallet-to-TSP connection accompanied by an easy to implement Mobile SDK.

The product consists of all necessary components to handle security, tokenization and issuance, lifecycle management and transacting. Everything delivered with ready-to-use backend APIs and mobile SDK to ensure a fast and easy implementation.

Our solution, certified by Mastercard, Visa and American Express, is a configurable and scalable product, adjustable to the issuer's specific needs. Select the card networks and 'Pays' to enable the solution and implement them through a lean step-by-step approach suitable for your business.

The Facts

- ▶ Enable OEM Pays and your own wallet through one simple solution supporting all card schemes.
- ▶ Use the Issuer-to-TSP and Wallet-to-TSP connections to enable OEM Pays, SRC and Issuer Pay.
- ▶ Enables MDES, VTS and AmexTSP through the same Mobile SDK.
- ▶ Pre-certified solution that simplifies the go-live process and reduces the time-to-market.
- ▶ Hosted in a PCI-DSS certified environment following the latest specifications and standards from the payment schemes.

The Benefits

- ▶ Utilize the Mea Token Platform to drive innovation and accomplish your digital strategies.
- ▶ Leverage the latest within payment security through EMV tokenization.
- ▶ Simplify integration with one single interface towards multiple TSPs.
- ▶ A configurable and scalable product that ensures fast time-to-market with lower risk and reduced cost.
- ▶ Extend with value-added services such as Token Connect and Control, Spend Control and custom reporting.
